

```
//Program to find ASCII value of any character
import java.util.*;

public class ASCIIvalueFinder {
    public static void main(String[] args) {

        Scanner sc = new Scanner(System.in);

        System.out.print("Enter any character : ");
        char ch = sc.next().charAt(0);

        System.out.println("ASCII value of " + ch + " is : " + (int)ch);

    }
}
```
